

KAT RATT

Codice prodotto: 2530416

Category: Absent

Square-shaped rodenticide bait dispenser

Description:

Container for rodenticide baits complying with all safety and hygiene regulations. Suitable for dealing with mice. Equipped with a safety lock. Indoors, the bait can be placed in the tray or in the block holder, which can be positioned either horizontally or vertically. Possibility of inserting a spring trap inside the container (optional). Suitable for indoor and outdoor use. Ideal for the food industry.

Technical information:

Dimensions (width, height, depth): 20.5 x 7 x 13 cm

Weight: 125 g

Material: plastic

Colour: black

Capture spring available (optional)

Method of use:

1. install the dispenser along the wall using expansion nails or similar.
2. open the lid of the dispenser using the key
3. fill with rodenticide bait and close again.

Once the container is secured, only mice will have access to the bait.

In accordance with current safety and hygiene regulations, rodent extermination must be carried out in such a way that children, pets and unaware persons cannot come into contact with the rodenticide baits. The use of Kat Ratt simplifies the checking and renewal of rodenticide baits, prolongs the palatability of the baits and protects them, thus significantly improving the effectiveness of the rodent control. Can be used with both bait in sachets and bait in blocks.
