

PYREOMATIC

Codice prodotto: 3400312

Category: PMC

Aerosol insecticide for domestic and civil use for application with Copyr automatic dispenser

Italian Ministry of Health Registration:

n. 18639

Formula:

Aerosol

Description:

PYREOMATIC is an insecticide canister based on natural Pyrethrum, synergised with Piperonyl Butoxide, for use in houses, hotels, schools, shops, hospitals, homes in general, warehouses, industries - including food industries. PYREOMATIC ensures the elimination of flying insects (flies, mosquitoes, etc.) thanks to the knockdown power and the repellence exerted by the Pyrethrum on all insects, which are thus kept away from the treated environments. The special dispenser valve dispenses a predetermined quantity of insecticide, sufficient to control a space of approximately 200 m3.

Method of use:

The canister is mechanically operated by an automatic dispenser.

Place the dispenser system at least 1.80 m from the floor, in a position where the jet is directed away from people.

Do not apply in the vicinity of air conditioning systems.

Ensure there is sufficient ventilation in the room.

User:

Professional

Warnings:

Do not contaminate foodstuffs, beverages or their containers during use.

Avoid inhaling the spray directly and spraying it into the eyes.

If the product is used in areas of long-term occupancy or in bedrooms, ventilate the room before returning.

Unit of sales:

Thinking Forward
