SPORT INSECT REPELLENT

Codice prodotto: 3000002

Category: Biocide

Ready-to-use insect repellent lotion. For topical use.

Italian Ministry of Health Registration:

IT/2017/00378/AUT

Formula:

Liquid Spray No Gas

Description:

SPORT INSECT REPELLENT is a ready-to-use insect repellent lotion. It protects against bites from mosquitoes of various species, including the Tiger mosquito, both by day and at night, for up to eight hours. Suitable for use in areas infested with tropical mosquitoes (Anopheles gambiae) where it provides protection for three hours. SPORT INSECT REPELLENT is effective against simuliids (black midges that attack mammals) and is therefore particularly suitable for use in infested areas such as stables, farms, campsites and rural areas, for up to 6 hours. SPORT INSECT REPELLENT is also effective against ticks, protecting the treated areas for six hours. Its use is therefore indicated in case of frequentation of infested areas such as wooded areas, meadows, agricultural areas and rural areas in general. Very useful in areas of vector-borne diseases to prevent their spread. For the safety of children, the repellent contains DENATONIUM BENZOATE, a very bitter substance which helps to prevent accidental ingestion of the product. Contains Aloe Vera as a skin emollient. The applicator allows proper and easy dosing of the lotion.

Method of use:

The product should be used outdoors or in well ventilated areas. Shake before use. Apply the product evenly on the skin to be protected. For application to the face and neck, dispense a little product into the palm of the hand and spread, avoiding the eyes, nose and mouth. Do not use the product on hair or clothing.

User:

Domestic

Warnings:
