

CUBO 3 DELUXE

Codice prodotto: 3200061

Category: Absent

Portable ozone unit for air treatment

Description:

Portable ozone unit with an integrated oxygen conversion system. Can be controlled using remote control from a device equipped with wi-fi. The unit is easy to move around and can be used to sanitise small and medium-sized rooms. It is equipped with 8 programmes with cycles from 15 minutes to 24 hours, which produce 8 gr/h of ozone, and in each of these programmes there is a reversion cycle. Cubo3 Deluxe has the same characteristics as Cubo3 and is equipped with a safety sensor that activates the ozone conversion process until the safety limits are reached. It can also be managed via wifi from smartphones or tablets.

Technical information:

- Weight: 7.3 kg
- Dimensions: 28 x 28 x 28 cm

Method of use:

CUBO3 DELUXE must be placed inside a room (room, garage, cell, warehouse, processing room, etc.) and once the most suitable programme has been chosen, it will carry out a complete cycle of ozone introduction and reversion. Ozone interacts with odours, bacteria, viruses, fungi, generating two events: oxidation and disinfection. Ozone acts very quickly, destroying bacteria, moulds, odours and inactivating viruses as soon as they come into contact. The end result is natural and clean oxygen.
